My name is Aizhan. I'm from Kazakhstan. I study at "World Economy" in my country. In Spain, I study at the faculty of commerce. A year ago, I won a grant for studying in the University of Valladolid and it's a great honor to study here. It's my first experience studying in a foreign country and a good opportunity to practise my English and learn a new language.

I arrived to Spain on the first of February. It was really difficult at the beginning. At first, I sort out my documents, which were necessary for the university and for opening my student card in bank "Santander". Then, I visited some shops, supermarkets and the centre of the city, starting the adaptation to the life in Spain. I always shoot videos and I hope they upload them. Living here, I realized that the life in Spain is different than in Kazakhstan and, of course, everything is interesting and new for me. I live in a flat, which is not far from my faculty, with 2 girls; Eulalie, from France and Kamila, from Kazakhstan, who came here to study with me. They are very nice.

Now I want to talk about studying in Spain. I chose 3 subjects to study and all of them are very interesting and creative. I met many people from Europe, Asia, etc. Many of them are communicative and friendly. I started to learn Spanish. I'm very interested in it.

I went to three cities of Spain: Madrid, Barcelona and San Sebastian. Two weeks after my arrival, I decided to go to Madrid, the capital of Spain, with my friend from Kazakhstan. It's very beautiful city and I enjoyed it. Honestly, I like Madrid

more than Barcelona. At the end of February, I went to Barcelona with my friends from Kyrgyzstan. It was a memorable trip, we visit such a different places.

Now, I organized a trip with my friends. Our trip includes some countries such as France, Luxembourg, Netherlands or Belgium. I believe that it will be the best trip.

I'm really happy to study in Spain. I want to thank Erasmus + for this great opportunity. I hope that this period of my life will be the brightest.
